

## Exploring Sepsis Strategies Part 2: Care Coordination & Prevention of Sepsis-Related Readmissions

September 30<sup>th</sup>, 2021

### Q&A Responses

- Q:** I would like to inquire what tools do you have in place to provide sepsis education to patients being discharged to home to prevent them from coming back to the ED?

**A:** Please see the sepsis fact sheet pdfs provided in the post-event email.
- Q:** Any recommended educational videos for nursing staff re: sepsis that covers identification, treatment, pathophysiology for RNs?

**A: Nurses in long term care:**  
<https://healthinsight.org/tools-and-resources/download/367-sepsis/1737-early-recognition-of-sepsis-in-long-term-care>

**For families – general population**

**Sepsis Awareness Training for Non-Clinical Staff:**  
<https://www.youtube.com/watch?v=DnsQ4RiXsZY>

**Sepsis alliance training module for nurses is geared more towards hospital nurses:**  
<https://www.sepsis.org/trainingmodule/nurses-suspect-sepsis/>
- Q:** Best practices for engaging LTC leaders in collaborating with hospitals?

**A:** I think right now, if you plan on starting one [a collaboration] right now it's going to be a little bit more difficult, just because of everything with the pandemic. So just being understanding of what they're [LTC facilities] going through....especially now with the pandemic the relationship is what gets things done versus really focusing on the nitty gritty.
- Q:** Wondering if Jackie put "Sepsis" on those community meetings as an agenda item on a regular basis? I'm sure they had a ton of other topics to discuss, how did they keep sepsis as a regular working item?

**A:** It wasn't on a regular basis, but it definitely was when we you know we're focusing on it in certain meetings, it was as an agenda item yes.
