

CHRONIC DISEASE SELF-MANAGEMENT EDUCATION (CDSME) continued

- Improving access to non-pharmacological interventions to help decrease opioid use for Medicare beneficiaries living with chronic pain through sustainable self-management programs;
- Increasing early screening, timely diagnosis of CKD through sustainable self-management programs; and
- Increasing access to behavioral health services through training and technical assistance.

Practice Education & Tools

- Facilitating clinical decision making and patient education via IPRO QIN-QIO CKD Mobile apps;
- Benchmarking and comparative feedback data reports could include regional, state, county, community, healthcare network, practice, and individual provider levels for comparative analysis;
- Educational resources for clinicians, staff, patients, and residents to support CDSME activities; and
- Access to dashboards displaying your data for comparative and feedback within your service area.

To begin this journey, the IPRO QIN-QIO team will assist you with

- Completing a CDSME needs assessment to establish priorities, baseline data, and training needs;
- Identifying key areas in which your practice would like assistance; and
- Updating data files on a monthly basis.

Highlighted Tools and Resources

Here's a glimpse of the types of quality improvement tools and resources we'll share over the next five years.

Cardiovascular Health	Pre-diabetes and Diabetes	Chronic Pain	Chronic Kidney Disease (CKD)
<ul style="list-style-type: none"> • IPRO QIN-QIO Self-Measured Blood Pressure Program (SMBP) 	<ul style="list-style-type: none"> • Web-based referral tool for the Diabetes Prevention Program (DPP) or Medicare Diabetes Prevention Program (MDPP). • Community resources portal 	<ul style="list-style-type: none"> • Design, training, and implementation of non-pharmacological interventions and programs to reduce opioid misuse 	<ul style="list-style-type: none"> • CKD-Awareness and Prevention Program (CKD-APP) training • Clinician mobile application • Patient and Family mobile application
