

Value in Vaccination: Video Discussion Series

Vaccines save lives, but we all have our own reasons for getting vaccinated. The IPRO QIN-QIO introduces a **Value in Vaccination** video discussion series, designed for interactive conversations about why you get vaccinated.

Meant for small group sessions, these documents aim to prompt discussion as a group or between individuals to gain new insights and learn other's perspectives on vaccination.

Here are a few suggestions to get started:

- Print them out and have individuals answer them on their own. Once completed have individuals bring them to the group leader for a discussion on the answers.
- A group leader can pose each question individually and have a group discussion.
- Have individuals turn to the person next to them for a one-on-one conversation.

To watch the video start here: <https://www.youtube.com/watch?v=LiKp-dCCeIs>

Part 1 Theme: Getting Information

- Did you feel that you had enough information to decide whether you wanted to get the vaccine?
- What type of information did you receive? What did you like most about the information? What information was the most valuable?
- What were your sources of information?
- Do you think that you had enough information about the benefits and risks of the vaccine?
